

## ELECSYS SENTRA-SERIES FOR TANK LEVEL MEASUREMENTS

Elecsys Sentra-series products are designed to:

- accept any 0-5V, 0-10V or 4-20mA input sensor/transducer
- be accurate regardless of tank geometry
- be configurable in either gallons or as a percentage
- store up to 8GB of internal memory
- be accessible via our secure web-based application or our easy-to-use app, Elecsys Connect
- provide immediate alerts
- expand with your growing system
- deploy easily

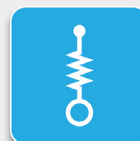

Programmable over the web

Surge resistant circuitry

Rechargeable NiCd backup battery for notification of power failure

2 Analog voltage inputs, 2 sensor/transducer inputs, and 1 digital input
